PROFILE

Creative leader who specializes in turning emerging technology into brands, products, and experiences people actually use. For 25 years I have moved with each new medium, from interactive multimedia to web and mobile apps, real-time 3D, XR, and now generative AI, and found how to make it useful, on brand, and executable for real teams and clients. I have led creative and product teams at startups, agencies, and Oracle, built three brands from the ground up, and served as a strategic creative partner to brands including Rubbermaid, McAfee, and Britax. I combine emerging technology, design thinking, and an understanding of human behavior to design experiences that engage audiences in new ways, then guide teams with Agile practices to deliver those experiences and keep making them better. I stay hands-on across brand, UX/UI, video, 3D, and AI-accelerated production, so I lead from the work, not from a distance.

SELECTED HIGHLIGHTS

- Design lead for OrchestrateXR, a commercial XR authoring platform that makes building XR training experiences as easy as building a PowerPoint deck.
- Nearly a decade as a strategic creative partner to Rubbermaid, McAfee, Britax, and other national brands, with Horizon Interactive Gold and Umbraco awards for UI/UX design.
- Developed the landscape assessment of extended reality for training for the U.S. Department of Homeland Security.
- Unified two globally distributed Oracle teams (India, Europe, US, Mexico) into one cohesive unit within 3 months. Generated 20% of annual agency revenue through new client wins including McAfee, Danone, Ironmark, and Absolute Software.
- AI-accelerated production: cut research from days to hours, design cycles from weeks to days, and content production from months to weeks.
